

2017 SOLAR ECLIPSE

August 16, 2017

Dear Valued Customer:

On August 21, 2017, a total solar eclipse will pass over parts of North America and the world. A total solar eclipse is an exciting and rare phenomenon. However, looking at the solar eclipse without proper protection can be real dangerous to a person's vision. While FGX International Inc. (FGX) offers a variety of sunglasses and other eyewear products, **NONE OF FGX'S PRODUCTS ARE INTENDED FOR USE TO VIEW A SOLAR ECLIPSE AND DO NOT MEET THE INTERNATIONAL SAFETY STANDARDS SET FOR PRODUCTS INTENDED FOR USE WHEN VIEWING A SOLAR ECLIPSE.**

If you have any questions about your eye health or viewing the solar eclipse, FGX strongly urges you to contact your eye doctor or medical professional directly.
